

**LCBI 15W 700mA BASIC phase-cut Ip
(89800257), 230V/50Hz**

**LCBI 14W 700mA BASIC phase-cut SR (89800268),
230V/50Hz**

⚠ CAUTION!

The maximum number of control gear per dimmer is defined by the power of the control gear and the dimmer:

- ▶ The total power of all connected control gear must not exceed 50% of the power of the dimmer.

Example:

- ▶ Power of dimmer: 600 W → 50% power: 300 W
- ▶ Power of control gear: 15 W
- ▶ Maximum number of control gear: $300 \text{ W} : 15 \text{ W} \leq 20$ devices

Values for dimmers at full load

Explanation:

1. Dimmer types: leading-edge, trailing-edge, universal
2. Noise evaluation: 1 (very little noise) → 4 (strong noise).
Noise evaluation was only carried out for full load. Values for minimum load are less critical. For reference refer to full load.
3. Flicker evaluation: 1 (no flicker) → 4 (strong flicker)
4. Other issues: description of the issue.
ZSL-UP is an additional circuit that can improve the dimming behavior of specific lamps.
